

Administration Center O₂

Munich, Georg-Brauchle-Ring 25

8-story business-center with large underground garage

The structure consists of reinforced concrete with large and partly pre-stressed flat slabs and pre-stressed edge beams for supporting of the facade and large ceiling slabs of the underground garage.

The building is founded on a large groundwater slab of water impermeable concrete.

Complete slab area	ca. 36.000 m ²
Cost of building	ca. 50 Mio EUR
